Tech rider and hospitality

Notes

In addition to the 3 “wedge monitors,” 4 lines are required for ear monitors as described in the channel list.

If the stage configuration allows it, the DJ console should be positioned next to the drums.

Two auxiliary output lines from the main mixer (right and left) are required in order to record the concert audio with our personal recorder.

A support for the DJ equipment. Height: 105mm – Surface: 75mm x 130mm

A support for the drummer's audio control unit near the seat

Lights and fog machine

A professional lighting system with a resident light technician is required.

Please avoid using the fog machine during our show

Load in - Soundcheck

A minimum of 45 minutes of load-in and a minimum of 45 minutes of soundcheck are required after the stage is wired and ready

Backstage

A backstage room for the band's exclusive use is required.

Canned beer, soft drinks, energy drinks, and still water are welcome in thebackstage.

Crew

The crew consists of 5 musicians and 1 driver

Dinner/Catering

The organizer is required to provide dinner for 6 people at their own expense, in addition to any extra drinks that may be served during the evening.

Please provide a large number of plastic bottles of still water for the stage.

Accommodation

The organizer is in charge of the accommodation at his own expense for 6 people for the night of the concert (and the night before, if previously agreed upon)
